Subject: Question Regarding Content-30-Day Public Comment Period for New Site

Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Good afternoon,

Prior to our submittal of the new site proposal, I know that we have a 30-day comment period. I was told that this is likely an addendum to our Annual Network Plan. Within the addendum, how much detail regarding the site will be required? Are we to add the monitors and the site as if they were already part of the network with a caveat stating proposed? Or would the addendum be like an appendix describing the site, the purpose, the location, etc.? Please advise. Thank you for your help.

Michael
