Hi Darren and Erin,

Attached is the Modified 2025 Shelby County Ambient Air Monitoring Network Plan. We have sent the public notice to the newspaper and are waiting to hear when it will be published (hopeful that it will be Tuesday, but may be later). Aside from the new SW Memphis site (Riverview) in Appendices A and B, there were changes that included nearest road, traffic counter, and major highway or interstate with distances and traffic counts for all monitor sites (including the proposed Riverview site). In addition, we noted in the Shelby Farms (NCore) Background and Discussion that the ozone monitor was the highest of the metro ozone design values at 73 ppb for the 2022-2024 years (2024 DV). I would appreciate any input if you believe that there should be any changes or additions. Thanks.

Michael
