Hi Erin,

Below is the information that you requested. If you need more information or clarification, I am happy to assist. I believe it would be beneficial to contact our Public Information Officer, Joan Carr at 901-222-9010 or feel free to e-mail her (e-mail above).

The Shelby County Health Department is moving forward with plans to install a new monitoring site in South Memphis (planned zip code 38109) using a grant provided by the U.S. Environmental Protection Agency. The official Shelby County Health Department site proposal (including the site evaluation) is being finalized and is expected to be submitted no later than next week. The time frame of the installation will be dependent on several factors. These factors include:

- EPA review and approval of the SCHD South Memphis site proposal
- Shelby County purchasing process
- Availability of necessary equipment and materials
- Construction of the shelter building
- Time frame for laying concrete pad including curing process
- Availability and schedule of contractors to install building, utilities, fencing, etc.

Based on the variables above, it is the goal of the Shelby County Health Department for the South Memphis air monitoring site to be operational by Fall 2025.

Best Regards,

Michael

Hi Michael,

I was wondering if you had any new information regarding Shelby County's plans to install a new monitoring site. We're putting together a Q&A for Denise for an interview she's going to do with local news in Memphis. We want to make sure the work you are doing is highlighted accurately!

Any information will be helpful!

Thank you,

Erin N. Frew
